

Installation of EazyRadio on MacOS

Note: Compatible only with MacOS computers. Not compatible with tablets or phones.

- Download **AIR for MacOS** :
<http://tv1.eazyradio.fr/updates/AdobeAIRInstallerMac.dmg>
- Download the latest version of EazyRadio for MacOS:
http://r1.eazyradio.fr/updates/mg_player_air314_164.air
- Have your MacOS device session password ready (the one used to log in when starting your Mac).
- Run AIR (AdobeAIRInstallerMac.dmg) to install it.
- Note: You might encounter an installation error; if so, proceed to the next step regardless.
- Open the Terminal on Mac (press Cmd + Space, type "Terminal").
- In the Terminal, enter these commands:

```
cd /Library/Frameworks
```

and **press Enter**

And type these command :

```
sudo xattr -r -d com.apple.quarantine ./Adobe\ AIR.framework
```

and **press Enter**

Enter your Administrator password (blindly, as the characters won't display; this is normal)

and **press Enter**.

- Run **mg_player_air314_164.air** that you previously downloaded to proceed with its installation.
- An **EazyRadio** icon will appear on the desktop.
- Double-click on **EazyRadio** and enter the client credentials
- Verify that **EazyRadio** launches properly.
- You can then log in with your **username** and **password**, which you should have received by email.
